Custom Room Design with Single Screen

Client: DNC Host Committee 2020

Staging Solutions designed this custom configuration to create a setting for the Democratic National Convention Search Committee breakfast meeting. Using pre-installed house lighting and audio equipment, combined with a supplemental video package, the installation took only four hours to complete, and provided an intimate and atmospheric space.

Custom Set Design with Multiple Screens and LED Walls

Client: Trimble T & L

Staging Solutions used pre-installed house lighting and audio equipment as a starting place for this custom augmented scenic/production package. The set was designed and fabricated in-house, including a custom-built circular stage, rear upstage LED wall, three custom circular center screens, and a monitor array wall. Staging provided all supplemental equipment and personnel for this event.

Multi-Dimensional Custom Set and Room Design

Client: HFC Comicpalooza 2017/2019

Each year Staging Solutions has created a custom room design for Comicpalooza to provide a fresh and exciting environment for presenters like Tom Holland, Emilia Clarke, and Chuck Norris. Original set components, IMAG screens, custom-designed lighting, and unique set pieces are combined to provide a Marvel-ous room for the event.

Simple Set, Complex Technology

Client: ESRI Petroleum Conference 2019

On a simple, streamlined set Staging Solutions provided sophisticated technical infrastructure for the ESRI Petroleum Conference that captured IMAG shots and immediately transferred, edited, and uploaded them to the show's website in real time. This showcase allowed ESRI to demonstrate new technology and software to their audience.

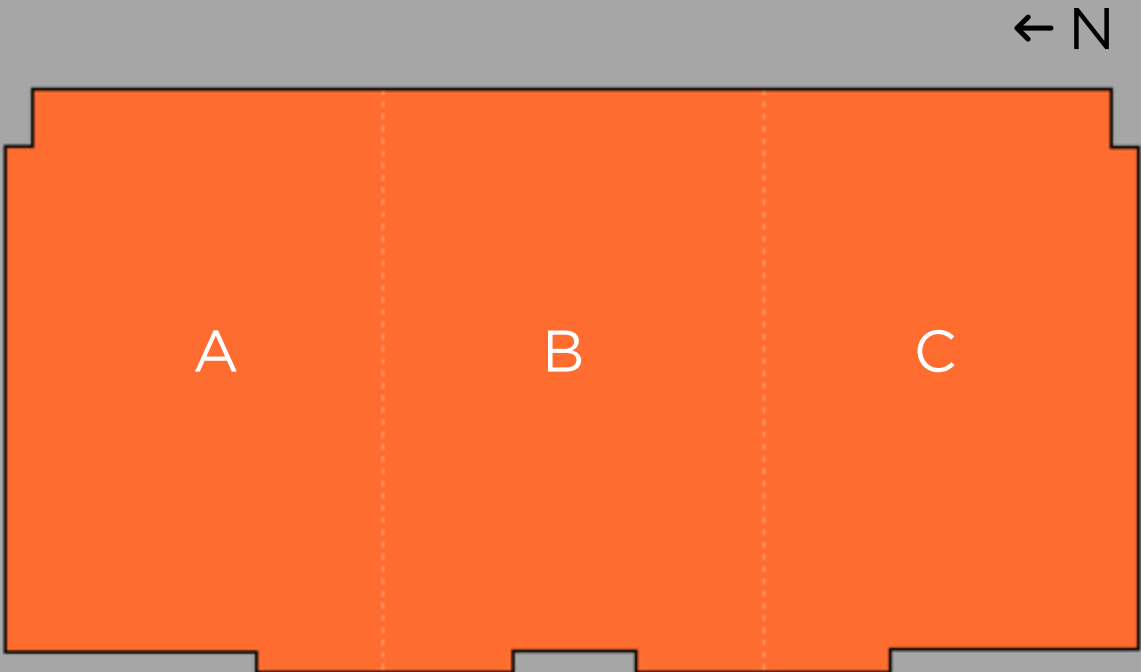

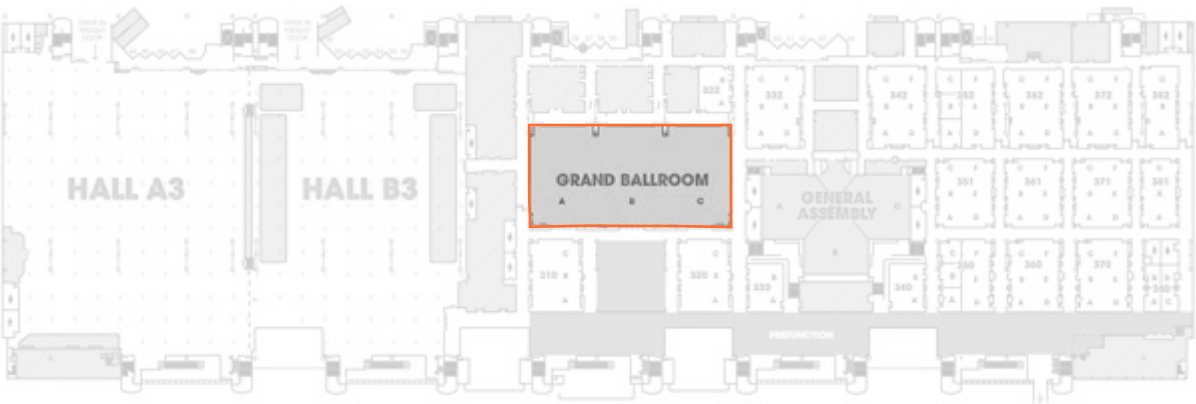

The background of the image is a blurred photograph of the interior of the George Bush Ballroom. It shows a large, ornate hall with a high ceiling, chandeliers, and a patterned carpet. The text is overlaid on a semi-transparent orange rectangular box with a clipped top-right corner.

Large Scale Immersive Experience

Client: HP Reinvent 2019

Staging Solutions designed and fabricated HP Reinvent 2019, creating a large-scale immersive experience. Guests were transported the moment they entered the space and progressed through a variety of environments including a customized gaming area, a modern office, an outdoor festival, and numerous other designs. The showcase featured a full spectrum of HP products in various markets.

Gala Event with Live Music, Presentations

Client: Mayor's Office of Trade and International Affairs

The annual Consular Ball event requires an elaborate design and flawless execution, as it hosts consuls general from around the world. Staging Solutions has designed custom sets with multiple screens for projection camera and graphic playback to support presentations by the Mayor of Houston and other distinguished guests; audio support for a full orchestra; and a stage, sets, and atmospheric lighting to support presentations, performance, and dancing. The design also accommodated a red-carpet entry and sabre salute.

Unique, Adaptable Spaces

Client: NAPE 2018

Staging Solutions has designed for the NAPE oil and gas show for several years. This annual event requires adaptable space that is sub-divided into three separate sections, then combined into one cohesive space for the closing luncheon. Staging Solutions designed the room to accommodate these demands, including projection screens, lighting, and original set design in each space.

Quick, Complete Transformation

Client: Trimble insight 2018

Staging Solutions was tasked with transforming the Trimble T&L ballroom from a meeting space to a nightclub, complete with DJ and dancefloor, within six hours. The infrastructure of the flown video and lighting setup was consistent in both designs, but the space was completely converted at the conclusion of the business meeting.

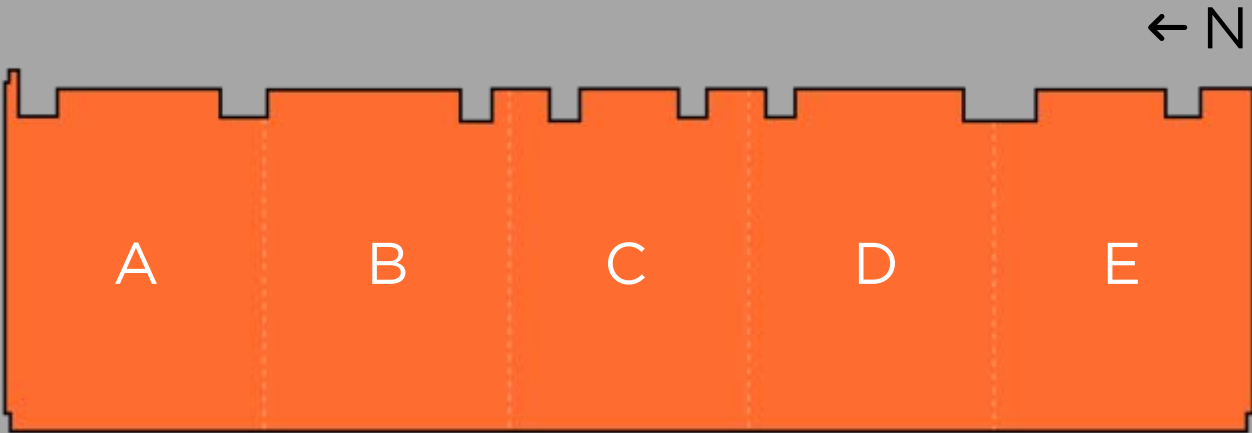

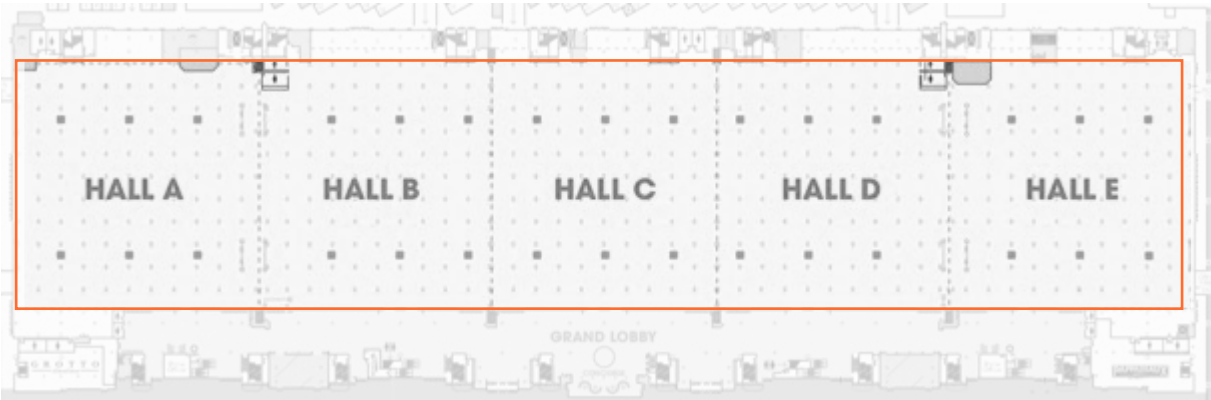

The background of the image is a blurred photograph of a large exhibition hall. The ceiling is high and features a complex network of blue structural beams and numerous bright, circular spotlights. The floor is a light-colored, polished surface that reflects the overhead lights. In the background, there are some red and white structures, possibly part of the exhibition setup.

Large, Immersive Environment

Client: ABB 2018/2019

Staging Solutions designed an immersive, large-scale environment for ABB's Customer World General Sessions. On-target brand integration was key to capturing the attention of the audience of over 3,500, and the overall design was an extension of the company's identity. Custom staging and fabrication of ultra-wide, panoramic screens and wrap-around scenic elements anchored the space, and custom designed, blended widescreen graphic content engaged the audience. The 2019 event featured over 20 HD Data Projectors and more than 100 moving lights.

Rigging for Large-Scale, Multi-Level Events

Client: AKA 2019

Staging Solutions installed rigging on the ground floor and in upstairs exhibit halls, using over 220 motors for the 2018 Alpha Kappa Alpha sorority. The stage for the event's main session was set in Exhibit Hall E; delay screens with audio made the presentations accessible throughout the remaining four halls.
